

AGCO builds products to service the world's agricultural community and sources components from more than 3,000 suppliers around the world.

Challenge

- Regionally distinct and disconnected solutions made it impossible for AGCO's purchasing personnel to budget, manage, and execute procurement.
- AGCO's vision was to increase global data transparency with a new, cloud-based application that can integrate data from both the purchasing and finance functions.
- AGCO needed a partner with deep knowledge and implementation expertise of SAP Cloud Platform & Technologies to create this application.

Cherrywork® Integrated Global Procurement Application for AGCO

Solution

A single, integrated global purchasing and savings application built on SAP® Cloud Platform was designed to manage the company's global supplier spend, enable better forecasting and budgeting, and eliminate manual processes.

Outcome

- More than 400 purchasing and finance professionals – working around the globe – now rely on an integrated global solution to manage spend, savings, and budgeting.
- End-to-end visibility into purchasing operations with a single portal for global supplier interactions.

Business Impact

400 Empowered Users

1 Global Process Template

100% Elimination of manual purchasing processes
