

Customer is an American worldwide manufacturing services company.

Challenge

- JABIL had a highly complex price management process for the core components across various divisions. Due to complexities of the manual processes, there was limited view on the price trends and market outlook. The prices are managed in Microsoft Excel leading to issues related to data integrity, visibility and longer cycles.

Cherrywork® Intelligent Price Management

Solution

- ✓ An integrated price management application on SAP Cloud Platform designed to manage the company's global and divisional commodity prices with detailed price trend and analytics and provide end-to-end visibility of the pricing process.

Outcome

- Large number of commodity and customer managers working around the globe now rely on the integrated global solution to manage commodity prices. Personnel gained E2E visibility into price management operations through a single portal to manage commodity prices effectively with best-of-breed user interface.

Business Impact

100%

Expected manual processes eliminated

100%
