

An American fortune 500 company and one of the largest manufacturers of medium and heavy-duty commercial vehicles in the world. It also designs and manufactures advanced diesel engines, provides financial services, information technology, and distributes truck parts related to its principal business.

Challenge

- Non-centralized manual processes for order management, freight management and bid management
- High cost and lack of clear visibility on planned routes, carriers of goods, planning of delivery for suppliers
- Customs management through emails

Cherrywork® Unified Portal with SAP Transportation Management

Solution

- ✓ Unified supplier portal on SAP Cloud platform
- ✓ Real-time collaboration between suppliers and client's internal teams
- ✓ The supplier portal integration with SAP TM and GTS systems
- ✓ Built using multiple SCP services like Fiori, java, ODATA, HANA, integration and IAS

Outcome

- Increased productivity
- Clear visibility on carriers of supplier goods, planned routes, cross talk shipment and planning of delivery
- Route optimization resulted in significant reduction in cost of transportation
- Advance shipment notifications helped with warehouse management
- Reduction in operational expenses as a result of optimized customs processes

Business Impact

100%

Dependence on paperwork eliminated

360°
